Abstract. Rules written only in prose are broken as often as rules a linter checks.
This sentence fills the first page and is not quoted by any test.

Introduction. Rules written only in prose are broken as often as rules a linter checks. We ran Checkstyle before and after applying the initial patch and the final patch. Most repositories never turn on the configu-
rations of every linter they install, and nobody notices.

Developers can configure most
linters through a file that
sits next to the code.

The right column talks
about something else
entirely, line by line.
